8K

HDR

With our UHD (7680x4320 @60Hz) capable DisplayPort fiber optic cable you have the possibility to connect up to 20m between your devices. The active cable (AOC) does not require a separate power supply and is particularly suitable for installation in the cable duct due to its small diameter.

- Total length of the end device distance (e. g. from notebook/laptop to beamer or PC to monitor): 20 meters

Hardware solution, no software required

- No external power supply required; the cable contains a copper fibre for power supply
- Small connector and cable dimensions; the cable has a smaller diameter than comparable cables made of pure copper due to the glass fibres.
- The practical plug design prevents the cable from slipping out of the DisplayPort socket.
- Compliant DP v1.4 (max. 7680 x 4320 @60Hz)
