ROLINE 19 Inch Wall Housing Basic 5 U short black

The wall-mounted enclosures in the ROLINE Basic series are perfect for housing active and passive components. They stand out from many other enclosures thanks to their simple and, above all, time-saving installation. Thanks to their modern design, they blend harmoniously into any office or home. The enclosure offers two separate mounting options: At the front is a rotatable vertical 3U rail, which can alternatively be positioned horizontally or at an angle. At the rear is a fixed horizontal 2U rail, which is suitable for passive network components, for example. The punched mounting holes in the entire lower housing area also allow the installation of non 19" components such as switches and routers. Alternatively, a mounting plate can be attached for this purpose.
